Fish nets, stringers, and fish tubs are available at camp for guest use.

We also provide adult PFDs that fit chest sizes 30-52 inches/76-132 cm. For children and adults who fall outside of this size range, please bring your own PFD.

PAYLOAD INFORMATION:

The airline will book aircraft based on the number of passengers in your group.
In line with industry standards, we suggest you plan for a cargo limit of approximately 55lbs per person.

Once the airline has confirmed the aircraft, an approximate total payload will be communicated to you. If you feel the payload provided by the airline is inadequate for your group, let us know and we can book supplemental aircraft at an additional cost.

Additional aircraft needed to carry unplanned overages on the day of your flight will be at your cost and may not always be available. Please let us know ahead of time if you require a higher payload.
